

Opportunity Based Selling

Storyboard | Final | 15 December 2017

ISD/Author: Alison Weinberg | email@email.com

Course Objectives

After completing this course, learners will be able to:

- Identify opportunities to sell tape products based on facility/solution
- Match need with Company product(s) and selling points
- Connect opportunity with earning potential

-  Sections or Chapter Slides
-  Activity Slides
-  Knowledge Check Slides
-  Video

Slide #	Slide title	Narration	Onscreen slide content	Graphics/media	Notes

1.1	Introduction	In the U.S. alone, the market for pressure sensitive tapes is valued at over seven billion dollars, annually. And growing. Opportunities to sell tape are everywhere. In every manufacturing facility. At packaging and shipping centers around the world. All over building and construction sites. The list goes on...	US Pressure-Sensitive Tape Market Valued at Over \$7B... and Growing!* Manufacturing Packaging and Shipping Building and Construction Consumer and Office *All data from Freedonia Report, 2014	U.S. map with line art and/or typography, similar to branded infographics Stock imagery representative of each of these industries.	

1.2	Welcome	Are you ready to learn how to increase earnings by “Recognizing Opportunities to Sell Tape Solutions?” Today, we’ll look specifically at one sector with wide reaching applications for pressure-sensitive tapes: manufacturing. Let’s get started.	Recognizing Opportunities to Sell Tape Solutions Today’s Focus: Manufacturing This course contains audio narration.	Logo treatment then fade logo and bring in the title.	
2.1	The Three “Rs”	Selling tape is about getting the right product in front of the right person at the right time. There are opportunities everywhere, and they can be easy to overlook – unless you know how to spot them. Find potential opportunities by following the Three “Rs”. 1. First, recognize that there’s an opportunity. Talk to people and look around. Ask questions and listen. Where are the problems that better tape can solve? 2. When you find one, recommend the right tape solution to get the job done. 3. Then, start reaping the benefit to your relationship and your bottom line.	The Three “Rs” of Selling Tape Solutions Recognize there’s an opportunity. Recommend the right tape solution in response. Reap the benefit to your relationship and bottom line.	Application photo @ “right product, right person” Typographical overlay for “Three Rs”	Designer: Collapse top-level 3Rs (2.2, 2.6, 2.7) under this slide in nav menu.

2.2	Recognize Opportunities	Recognizing opportunities to sell tape involves: Knowing Who To Talk To; Knowing What to Ask; and Knowing What to Look For, Where	Recognizing Opportunities Know Who To Talk To Know What to Ask Know What to Look For, Where	Line art and/or typography with animation	
2.3	Know Who To Talk To	Let's start with knowing who to talk to. Conversations with purchasing managers may drive tape to just a commodity. So, seek out and have conversations with the people who use tape in their everyday jobs. Engage with line workers and shift supervisors; production engineers and plant managers; office staff and maintenance crewmembers. People looking for simple solutions to get their jobs done, faster and better.	Know Who To Talk To Move your sales conversations beyond just purchasing managers. Engage with people looking for solutions that get the job done. Faster. Better.	Application photos showing different people using Tape Company products to do their work Alternatively, show line workers, maintenance crew, plant managers, etc.	Collapse in nav under 2.2
2.4	Know What To Ask	Asking questions is a great way to uncover opportunities. While your exact questions may change depending on the situation, here are some general ideas to get you started. Of course, it's also important to listen carefully, and note any challenges that better tape might be able to address.	Know What To Ask Ask about the facility and the kind of work that goes on there Ask about the work environment Ask about current solutions and their performance Ask about operational challenges (e.g., reducing downtime, waste, or damaged inventory)	Sales imagery	Collapse in nav under 2.2

2.5	Know What to Look For, Where	Whenever possible, talk to end users on their turf. While there, take notice of how tape is being used around the facility. Do you see any potential tape failures like flagging, peeling, or tape that's otherwise not performing as intended? Spotting malfunctions is the easiest way to start a conversation about better tape solutions.	Know What To Look For, Where Site visits make it easy to spot tape failure, and by extension, opportunities to discuss and sell a solution.	Examples of tape failure	Collapse in nav under 2.2
2.6	Inside the Facility	Click on the markers to learn more about what to look for in a typical manufacturing facility.	Inside the Facility Front Office Production Floor & Storage Areas Packing & Shipping Area Tool Crib & Paint Shop Click on the markers to learn more about what to look for in a typical manufacturing facility.	 Labeled markers on diagram nearest to the four listed areas	Collapse in nav under 2.2
2.6A	Wait	N/A	View all areas of the facility to proceed. [GO BACK]		
2.6B	Front Office	Look around any office environment, and you'll spot uses tape – particularly, masking and packaging tapes. A makeshift sign hanging loosely on a wall. Another laminated to a	In the Front Office [subheads] Tapes Used: Masking Tape Packaging Tape		

		countertop, edges peeling. Small packages, waiting to be sealed and shipped. A manual tape dispenser, with bunched and shredded tape. Talk to office managers about their current tape solutions to see if you can identify any pain points better tape could address.	Look For: Flagging, peeling tape (used in holding and lamination applications) Packaging materials, including manual tape applicators, especially with bunched or shredded tape Talk To: Office Managers		
2.6C	Production Floor / Storage Areas	Be on the lookout for opportunities to recommend tape solutions as you walk through the production floor and storage areas – where tape is used floor-to-ceiling. Look for floor marking that's been stripped away. Storage shelves labeled with masking tape that's peeling or deteriorating. Temporary repairs done with duct tape. Hazardous areas that need to be marked off for safety. Talk to plant managers and shift supervisors about anything you notice. Let them know you have a better solution in mind.	On the Production Floor & In Storage Areas [subheads] Tapes Used: Floor Marking Tape Masking Tape Marking & Flatback Tape Duct Tape Caution Tape Look For: Floor marking that's been stripped away Flagging, peeling, deteriorating labels Temporary repairs Insufficiently marked hazards Talk To: Plant Managers Shift Supervisors	 Floor marking, masking, marking/flatback, duct, caution tapes 	

2.6D	Packing Area	Of all the areas in a manufacturing facility, applications for pressure-sensitive tape are most obvious on the packing floor. But, spotting <i>problems</i> with current solutions takes a more watchful eye. Tape applicator malfunctions, uncut tape, and tape that doesn't stick. All of these can lead to line stoppage, clean-up, and rework. And discarded "stub rolls" – or, partially used rolls of tape – signal inefficiencies like more frequent line stoppages for tape roll changes, as well as wasted resources. Our packaging tape solutions are designed to solve these exact problems. Talk to line workers, plant managers, and shift supervisors about improving efficiencies with better tape solutions.	In the Packing Area [subheads] Tapes Used: Packaging Tape for Manual and Automated Case Sealing Filament/Strapping Tape Masking Tape Look For: Malfunctioning tape applicators, either manual or automatic Line stoppages due to uncut tape, tape not sticking Stub rolls Talk To: Line Workers Plant Managers Shift Supervisors		
2.6E	Tool Crib / Paint Shop	Industrial tool cribs and paint shops have widespread applications for tape products. Look for evidence of maintenance and restoration projects, as well as things needing repair – especially electrical, HVAC systems, machinery, and other equipment.	In Tool Crib & Paint Shop [subheads] Tapes Used: Electrical Tape Foil Tape Cloth and Duct Tape Masking Tape		

		And if the facility has a paint shop, remember that our company offers a variety of professional grade painters' tapes that consistently deliver superior results. Creating opportunities to sell tape could be as easy as stopping to talk to that maintenance crewmember that everyone else walked right on by. Conversations with Plant Managers can also reveal opportunities.	Specialty Tape Film Tape Look For: Evidence of ongoing facility maintenance and restoration projects General repairs to electrical, HVAC, machinery, and other equipment Paint shop and/or painting equipment Talk To: Maintenance Crew Plant Managers		
2.7	Recommend Solutions	Once you spot an opportunity, move quickly to recommend the right tape solution for the job. Your success matching the right product to the need depends on your ability to speak to the value in the efficiency and performance of our solutions. Getting to know our products will help you get ready. You can learn more about our products, anytime, by visiting our website. In the meantime, it's not too soon to start connecting those opportunities to your own earning potential. In this next activity, we'll do just that!	Recommending Tape Company Solutions Once you spot an opportunity, move quickly to recommend the right Tape Company solution for the job. Getting to know our products will help you get ready.	Full screen image with bullets and/or line art Rotating dial with dollar signs that moves with each recognized opportunity	

2.8	Reap the Benefit	Look around the packaging area of this manufacturing facility. Can you spot the five opportunities to increase earnings by recommending tape solutions? When you find one, click on it to learn more.	Hidden Opportunities Scenario Find the opportunities to increase earnings by recommending Tape Company solutions. [HINT]	 There will also be a variable controlled dial on-screen, labeled with dollar signs, that rotates incrementally each time the learner successfully identifies an opportunity. This visual element will reinforce the idea that earnings (can) increase with each opportunity found/recommendation made.	Click to Reveal Activity / Knowledge Check Designer: Add hover state to all clickable objects to help the user identify them on mouseover.
--	Hint (Button)	N/A	N/A	Add a layer that subtly reveals the "hidden" objects (e.g., glow effect)	
2.8A	Wait	N/A	Wait! There are more opportunities here. Don't leave potential business behind! [KEEP LOOKING]		

2.8B	Recycled Packing Container	There are many reasons why packaging tape can fail to stick to cartons. Dust, dirt, humidity, and cold temperatures can all play a role. But, did you know packaging tape doesn't always stick well to cartons made from recycled materials? Why risk the downtime, and the potential forfeiture of the product inside? Our Tape Company® Packaging Tapes are designed to keep lines running at peak production. They deliver consistent, instant closure, no matter the container type, size or packaging environment, to help achieve greater efficiency on the production line.	Spotted: Tape Not Sticking What's the Opportunity? Recommend the right packaging tape, based on environmental factors and carton materials. Our Solution: Tape Company® Packaging Tapes For consistent, instant container closure and greater efficiency on the production line	 Superimpose “recycled” or “post-consumer goods” symbol onto cardboard boxes. Product Image: Tape Company® Packaging Tape	
2.8C	Unused Tape Rolls	In manufacturing facilities, it's common to see upwards of 10-20% wasted packaging tape in the form of “stub rolls”. This also leads to significant downtime and inefficiency, as operators must stop the line more often to change the tape roll. That's a lot of unnecessary waste! Tape Company® Packaging Tapes are engineered to ensure full use of	Spotted: Stub Rolls What's the Opportunity? Help your customers reduce waste and downtime on the packaging floor. Our Solution: Tape Company® Packaging Tapes Ensures full use of every roll	  Product Image:	

		every roll to help prevent costly waste and downtime.		Tape Company® Packaging Tapes with Good-to-the-Core performance	
2.8D	Wet Paint	Facility maintenance and restoration projects are never-ending. Use them as an opening to talk about our tape solutions. Help your customers save time and get better results, with our masking and specialty tapes. Like our Premium grade, medium adhesion painter's tape for interior and exterior masking of multiple surfaces, including painted walls, glass, vinyl, metal and wood. And our professional grade, double-sided containment tape – a one-tape, one-step solution for creating high-performance containment systems for restoration, abatement and remodeling tasks.	Spotted: Paint Cans [subheads] What's the Opportunity? Help your customers get better results, the first time. 2.8E	Frayed Wire	Good catch! Those exposed electrical wires could be dangerous... This is a good opportunity to introduce our professional grade electrical tape. It's highly conformable to deliver secure, moisture-free seals. Plus, it's UL	Spotted: Exposed Electrical Wiring What's the Opportunity? Sell the value in professional grade performance. Our Solutions: Professional Grade Electrical Tape	 Product Images: Professional-grade, Electrical Tape	

		Listed and CSA Approved for electrical splicing and phasing applications, up to 600 volts. This might also be a good opportunity to recommend our non-adhesive barricade tape for marking restricted areas and safety hazards – available in a variety of easy-to-read warning messages, including Danger, Wet Paint, and Caution.	UL Listed and CSA Approved for electrical splicing and phasing applications Non-Adhesive Barricade Tape Available in a variety of easy-to-read warning messages for marking restricted areas and safety hazards	Non-Adhesive Barricade Tape	
2.8F	Flagging Floor Marking	Floor marking exists to protect employees from potential hazards. But, if it's flagging, stripped, or fading, it could put workers at risk. Support your customers' safety and compliance efforts by recommending Warning Stripe Tape. It meets OSHA requirements for lane marking and identification of safety zones and hazard areas. And it's resistant to UV light, abrasion, and corrosion from acids, alkalides, oils, and moisture, for lasting performance and reliability.	Spotted: Flagging Floor Marking What's the Opportunity?
